Residente — Distribution Plan

Customer-acquisition plan for the first 10–25 paying communities. Companion to `STRATEGY.md`. Constraint envelope: pre-launch · 2–4 person team · <$500/mo all-in · all-Florida.

Last updated: 2026-06-05 · The dead-simple operating playbook is in §13 (also mirrored standalone in `gtm/execution-manual.md`).

---

1. Executive Summary & Thesis

> **Thesis.** Residente lands its first 10–25 paying communities the way every zero-customer vertical SaaS does: **the founders personally sell, and do the setup by hand.** The engine is **founder-led direct outbound** to a finite, public, named list of self-managed Florida associations, closed with **free white-glove concierge onboarding** (the switching-cost moat manual incumbents can't match). Two assets multiply it: **warm intros from the two CAM attorneys** to their own client-boards, and a **board-to-board referral loop** (the proven HOA-vertical growth move). The pitch rests on a simple promise: self-managing a community used to be a second job — Residente does ~95% of the administrative work, so a board can run everything in a couple hours a month, with residents free. Fear of the 2026 laws sets the timing; transparency — *seeing exactly where every dollar of your dues goes* — turns residents into a demand signal that **warms and targets the outbound list** (the resident base is a conversion multiplier on the sales engine, not a replacement for it). Launch tone is management-company-**neutral** (see §2). **Content, community presence, and the resident funnel are real but secondary** — built now, harvested later. Sell with your mouth first; let the content compound behind you.

---

2. Positioning & the Three Levers

Brand line: *Residente — the owner-verifiable HOA platform. Built for residents, run on the law.*

The integrated story (one sentence, reorder by who you're talking to):

> *"Florida's 2026 laws are forcing your board to act **(FEAR)**. Self-managing used to be a second job — Residente does ~95% of the work, so your board stays self-managed without the headache, for $348 a year **(EMPOWERMENT — the core)**. And every resident sees **exactly where every dollar of their dues goes, line by line — and votes in an election no one can rig**, free **(TRANSPARENCY)**."*

Lever	Role	Audience	Use it as
3. Self-management made easy *(the spine)*	Core value prop — "all the work, 95% less time/headache"; durable → low churn	Boards	The reason to buy **and stay**
1. Compliance (fear → calm authority)	Timing trigger; a dated, unavoidable event	Boards	The **subject line**, not the product
2. Transparency (money-first)	"See where every dollar goes" (monthly, universal) + the un-riggable vote (episodic proof)	Residents	The **demand-gen + trust** layer that warms outbound

The economics (use SOFTLY — see the launch-tone note below):

Community	Management co. $/yr	Residente $/yr	Board keeps
20-unit condo	~$18,000 (min. contract)	$348 (Starter $29 flat)	**~$17,650**
60-unit HOA	~$10,800 ($15/unit)	$1,440 ($2/home)	**~$9,360**
120-unit condo	~$21,600 ($15/unit)	$7,200 ($5/home)	**~$14,400**

> ⚠️ **Launch tone = management-company-NEUTRAL.** Your beachhead is *self-managed* communities — they have no manager to attack — and your top referral channel (the two CAM attorneys) have management-company relationships. So at launch, lead with **positive empowerment** ("all the work, 95% less time/headache" · "self-managed, made easy"), NOT "fire your manager." Use the cost comparison **softly**, and mainly at the one *neutral* moment — a board *weighing whether to hire* a manager ("before you take that on, see how easy self-managing can be"). **Phase 2 expansion (deferred):** the aggressive "replace your management company" positioning + actively converting manager-managed communities — powerful later, but it would burn attorney goodwill now and isn't needed while we focus on self-managed.

> **"We do ~95% of the work"** — Residente automates dues/collections, the official-records website, meeting notices + minutes, secret-ballot voting/elections, compliance-deadline tracking, and owner comms + financial visibility. **Be honest about the ~5% it doesn't** (vendor/maintenance coordination, physical SIRS/milestone inspections, specific legal interpretation) — that honesty builds trust. A board can keep a part-time bookkeeper or on-call handyman for the 5% and still run lean.

Fear, reframed: NOT "you'll be fined." Instead: "*Here's the 2026 checklist for self-managed boards — and we'll set it up for you, free.*" Same deadline trigger, opposite emotion (relief + competence, not anxiety). Protects the attorneys' willingness to refer and keeps you off the UPL/ambulance-chasing line.

Transparency, money-first (the everyday resident hook): lead with the **money view** — *spending-vs-budget → reserve balance → per-category dues breakdown → board-decision feed* — then the un-riggable secret ballot as the dramatic proof. Voting is episodic; the money view lands every month. One line: "*Voting proves we can't rig your election — the money view proves it every single month.*" Resident hooks: EN "*See exactly where every dollar of your dues goes.*" · ES "*Mira exactamente a dónde va cada dólar de tu cuota.*" · PT "*Veja exatamente para onde vai cada dólar da sua taxa.*"

Quick claim fixes (before outreach): "100% of activity visible" → "every dollar of association spending, visible to every owner"; "no middleman" → "zero markup on resident payments — residents always free"; "guaranteed compliant" → "we surface the FL deadlines tied to their statutes and help you track them."

Light operating principle (compliance content stays UPL-safe): speak generally ("Florida law requires associations to…"), never "your association is breaking the law"; one-line "educational, not legal advice — consult your association's attorney" footer; route specifics to their attorney.

---

3. ICP & Targeting

Canonical ICP: *Self-managed Florida condo (25–150 units) or HOA (100+ parcels), at/just past a 2025–2026 compliance cliff, clustered by county.* Plus small self-managed (<25 homes) on the ROI + transparency story.

Highest-intent triggers (launch — all self-managed): a self-managed board **facing a 2026 deadline** (website mandate / SIRS / reserves) with no tool to respond; a **brand-new / developer-turnover** association (greenfield, choosing its first system); a board **weighing whether to hire a manager** (just crossed 25 units) — offer the easy self-managed path *before* they decide. *(Phase 2 expansion triggers, deferred to protect attorney goodwill: boards resenting an existing manager, and resident revolts against a manager.)*

Self-managed filter: DBPR "Managing Entity" = association's own name/blank/officer (skip if a management company); SunBiz registered agent = unit owner or the association's attorney (skip if RA = FirstService, Castle, Campbell, Associa, KW PROPERTY, RealManage, Vesta).

Free public-data runbook ($0): (1) **DBPR condo bulk dataset** (`www2.myfloridalicense.com` → Condominiums → Public Records); (2) **SunBiz** quarterly bulk download + officer/RA search (`search.sunbiz.org`) for names/addresses; (3) **county property appraisers** for unit counts + association office address; (4) HOAs via SunBiz name search filtered 100+ parcels. **Lead-sheet schema** (see `gtm/lead-sheet-template.csv`): `Association | County | City | Units | Self-managed Y/N | Manager (if any) + renewal | Deadline-exposure | Likely-language | President | Reg-agent | Mailing addr | Email | Phone | Source | Status`. Target **150–200 qualified rows → 10–25 closes.**

Cluster, don't spread: TAM is all-Florida, but win **one county first** (recommend Miami-Dade/Broward — density + your ES/PT edge); density lowers blended CAC 20–40% and feeds word-of-mouth. Depth over breadth in year one.

---

4. Phase 0 — Get Ready to Sell (~3–5 days, NOT a build phase)

> The binding constraint is founder conversations, not features — you can sell today. Keep this minimal; **do not gate outreach on the language toggle or content** (bilingual founders sell in ES/PT verbally now; UI falls back to English).

- ☐ Build the 150–200-row lead sheet (§3) and pick ONE county.
- ☐ One-page **"self-managed, made easy" pitch** (all the work, 95% less time + the 2026 checklist) leave-behind (EN/ES/PT).
- ☐ **CSV roster template** + example row (the white-glove import artifact).
- ☐ Set pricing live: Starter $29/mo ≤25, per-home tiers above, **card-up-front 30–60 day trial**, founding-member lock for the first ~25.
- ☐ Calendly/booking link + a 15-min demo script.
- ☐ Quick claim fixes (§2).
- ☐ Ask the two attorneys for their first 3 client intros each.

In parallel, weeks 2–4 (don't block selling): ES/PT language toggle, the self-serve onboarding wizard + Loom walkthroughs (§6), and the first content pieces (§5.5).

---

5. Channel Playbooks — RANKED for this team

#	Channel	Role	Cost	Metric
1	**Founder-led outbound + white-glove concierge close**	PRIMARY engine	$0–40/mo	Demos booked/week
2	**Warm intros: 2 CAM attorneys + board-to-board referral loop**	Force multiplier	$0	Intros per attorney / per customer

#	Channel	Role	Cost	Metric
3	**Community presence (CAI chapters, FB groups)**	Free, fast, warm	<$500/event	Qualified conversations/week
4	**Lighthouse → case study → county density**	Bootstraps proof	$0 (founder time)	Referenceable wins per county
5	**Content + targeted SEO**	Compounding amplifier (month 9+)	$0–13/mo	Organic demo requests/mo (watch slope)
6	**Resident demand layer (money-first) — warms & targets outbound (§5.6)**	Conversion *multiplier* on #1, not a standalone channel	$0	Warm/hot accounts (≥2–3 residents); warm-intro lift

> **The resident layer is a multiplier, not a parallel channel.** Warm/concentrated accounts convert ~15–25% vs ~1–2% cold — so the **building-level concentration signal feeds your #1 outbound targeting** directly (§5.1, §5.6). Realistic pre-traction contribution: ~5–15% of pipeline (rising toward 25–30% once you have an install base). For a platform built for residents, this is how they earn their place in the sales motion — without doing political labor.

5.1 Founder-led outbound + white-glove concierge close (PRIMARY)

Motion: a 5-touch, deadline-triggered sequence to the **registered agent / president** (public on SunBiz), then the founder runs the demo and closes with "all the work, 95% less time — and we'll set it up for you free." Lead with whichever lever fits the account (self-managed board facing the deadline → calm-authority checklist first; a board weighing whether to hire a manager → "self-manage the easy way" first).
Touches: Day 0 email · Day 2 call (association/RA **landline**, business hours) · Day 4 LinkedIn · Day 6 **cold direct-mail postcard** to the association office (<$1/piece) · Day 9 ROI email · Day 12 break-up + meeting-offer. ES/PT variants for Hispanic/Brazilian buildings. *(Full scripts in `gtm/scripts.md`.)*
Close tool: the white-glove offer — "*book a demo and we'll import your roster, post your records, and run your first vote with you, free, in English/Spanish/Portuguese.*"
Prioritize "hot" accounts: any association where ≥2–3 owners already hold free resident accounts jumps the queue — open the board with "*X of your owners already use Residente and want this for the whole community*" (see §5.6). This turns a cold call (~1–2%) into a warm one (~15–25%).
Metric: demos booked/week (the leading indicator for everything).

5.2 Warm intros — the two attorneys + board-to-board referral loop

Attorneys: each CAM attorney serves dozens of self-managed client-boards. After they've seen the product, ask each for **3 client intros** (not a partner program — two warm humans vouching). A CAM-attorney intro is worth more than 1,000 cold videos.
Board-to-board (the Vantaca move): the single best HOA-vertical growth fact — their first customer introduced peers, which *became* the first 10. Make this the explicit loop: at every go-live, ask for **one neighbor board name + a 2-line intro**; reward with a free month / extended founding-lock. **Referral ratio ≥1.0** = the flywheel turns.

5.3 Community presence (free, fast, warm)

- **CAI Florida chapters & "CA Day" trade shows** run **free board-member / homeowner-leader education tracks** — *attend* (no $5k booth), work the room, collect self-managed board-president cards.

- **FL board-member Facebook groups + HOA-reform communities** (e.g., *Self-Managed HOA/Condo Boards*, *Florida Condo & HOA Living*, HOA Reform Leaders): answer questions helpfully first, link only when asked.
- **Self-managed community gatherings** (self-management / DIY-HOA groups, 55+ community boards, new-association turnover meetings): the warm rooms at launch — lead with "self-managed, made easy." *(The "fire your management company" / manager-defector communities are a high-intent **Phase 2** channel, deferred while we stay management-neutral.)*

5.4 Lighthouse → case study → density

Pick 3–5 lighthouse communities (clustered in one county). Smother them with support → verifiable success → a **named case study + quote + 2–3 warm intros.** This bootstraps the proof that makes channels 5–6 convert.

5.5 Content + targeted SEO (compounding amplifier)

Lighter than a content factory: ~1 pillar article + 2–3 repurposed short videos per week, English-first; translate only what converts. Purpose = credibility + SEO that compounds for month 9+, plus collateral the founder uses in outreach. Lead topics by lever:

- **Self-management (soft, positive):** "Self-managing your HOA in a couple hours a month — the new math." · "All the admin work, 95% less time." · "Brand-new HOA? How to run it yourself the easy way."
- **Fear (calm authority):** "Florida HOA Website Requirement 2026 — the checklist (we'll set it up free)." · "SIRS / milestone deadlines: which buildings, by when."
- **Transparency:** "A board vote even the vendor can't read." · "See where every dollar of your dues goes."

Blog on the existing Next.js/Vercel domain (`/learn`); verbatim statutes; FAQ schema; attorney accuracy-review for E-E-A-T. Lead magnet: the **2026 Compliance Calendar PDF**.

5.6 Resident-powered growth layer (the warming engine for §5.1)

Residents are free, emotionally invested, and the people Residente is *built for* — so they belong in the sales motion. But at zero install base they **warm and target** outbound; they don't replace it. **The founder makes every board pitch; residents only grant permission and supply demand.** Realistic pre-traction contribution ~5–15% of pipeline (a conversion *multiplier*), rising toward 25–30% once an install base exists.

Turn ON now (pre-traction):

- *_Building-level demand concentration_ (the single best mechanic)_: when ≥2–3 owners in one association hold free accounts, flag it_ "warm/hot" _→ the founder opens the board with_ "X of your owners already use Residente and want this."* The strongest non-adversarial opener; converts at the warm band. $0 (a `GROUP BY association` flag).
- **Free signups as outbound enrichment:** capture the association name at signup ("*Which community do you live in? We'll set up your money view*") → cold DBPR/SunBiz rows become *ranked, warm* targets. Measure as intro quality, not signup vanity.
- **Resident → board warm intro — ONE TAP, name-permission only:** "*Know someone on your board? Introduce us — we'll take it from there.*" The resident grants a name/board email; **the founder pitches. Never advocacy.**
- **Targeted seeding:** in each *active target building*, seed 5–10 residents before the board demo (QR/flyer at the mailroom/clubhouse, a "see your dues, free" link in the resident FB/WhatsApp group) so the concentration signal is *true* when the founder walks in.
- **Quietly bank early-resident feedback** as design raw material (not published proof yet).

DEFER to Phase 2 (≥10 live associations): cross-community referrals, *published* resident testimonials (collect quietly now, publish later), and any resident-ambassador program (a community-management job that drains founder time with no base to draw on).

Guardrails: founder makes every pitch; nothing requiring recruiting/training/managing residents ships pre-traction; cap founder time on this layer **≤10%/week**, fenced from outbound; measure by **warm-intro conversion lift, not signup counts**; **one-tap ceiling** — more than one click + a name permission means you've rebuilt the petition; keep all resident asks **opt-in, money-framed, and county-local. No petition** (it manufactures conflict that poisons the white-glove arrival).

---

6. Onboarding — Three Tiers (protect the team's time)

White-glove only pays off above ~$10k/yr value, so reserve it; the trial carries volume; hybrid buys references.

Tier	What it is	Team cost	Who gets it
A — White-glove	We import the roster, post records, set up compliance + Stripe, run a 30-min board training	3–5 hrs	**High intent + value:** ready to pay / board voted / attorney intro / hard 2026 deadline, AND ≥$50/mo (26+ homes)
B — Self-serve trial *(default ~70–80%)*	5-step onboarding wizard + CSV template + Loom walkthroughs + async help	<30 min	**Medium/low intent or Starter <25:** "just exploring," inbound from content, single curious resident
C — Hybrid (white-glove + extended trial)	Both — a deliberate reference investment	4–6 hrs	**Strategic must-wins only:** 150+ units, key ES/PT community, designated lighthouse, influencer board. **Hard cap: 5 active.**

Routing tree:

```
New prospect
├─ Strategic must-win? → TIER C (cap 5)
├─ High intent AND ≥$50/mo? → TIER A
└─ Else → TIER B (self-serve trial)
         └─ clicks "Book setup help" AND qualifies → promote to A
```

Trial mechanics: card-up-front, opt-out 30–60 day trial (converts ~49% vs ~18% no-card; residents pay $0 so asking the board for a card is low-friction), auto-converts at expiry, founding-member lock as the close. **One human conversion touch at the activation milestone** (roster imported + first dues payment) — the PQL moment.
Self-serve minimum assets: CSV template w/ inline validation · 5-step wizard (first step a quick win: "see your 2026 deadlines"), progress saved · 3–5 Loom walkthroughs · welcome + behavioral email sequence (nudges day 3, day 10) · in-app chat + "Book setup help" button. Target **time-to-first-value < 5 min.**

---

7. Pricing & Packaging

Plan	Price
Starter (≤25 homes)	**$29/mo flat** (≈$348/yr; final number $25–39 band)
Pro (26–100)	$2/home/mo
Premium (101–500)	$5/home/mo
Enterprise (500+)	$10/home/mo
Residents	**always free, zero markup**

On-ramp: free white-glove (Tier A/C only) + **card-up-front 30–60 day trial** (Tier B) + **founding-member** (first ~25: low rate locked 2 yrs + logo + testimonial + 2 referrals). **Annual prepay = default close ask** ("$348 for the year") — front-loads cash. The flat Starter is real ARR, an easy yes, and lowest billing overhead.

8. Funnel, Metrics & Roles

Funnel: `Sourced → Reached → Demo booked → Demo done → Trial/started → ACTIVATED → Paying → Annual-prepaid → Referral`.
ACTIVATION (hard def): roster imported + records posted + ≥1 board login + (first vote OR first dues payment).

Level	Metric	Target
North-star	Net new **paying** communities/month	ramp 1 → 2 → 4/mo
Leading (primary)	**Demos booked/week**	≥4 (4-person) / ≥3 (2-person)
Activation	% activated within 14 days	≥70%
Flywheel	Referral intros per activated community	≥1.0
Resident layer	Warm/hot accounts (≥2–3 residents) + warm-intro conversion lift	grow; ~5–15% of pipeline pre-traction
Compounding	Organic demo requests/mo	watch the slope

Roles (4): Founder A — Closer (demos, closes, attorney relationships, references) · **Founder B — Bilingual Onboarder** (white-glove imports + first votes, ES/PT, trial activation rescue) · **Person C — Researcher/Outbound** (lead list + the 5-touch sequence + CRM) · **Person D — Content/Community** (1 pillar + 2–3 shorts/wk, FB/Reddit/Nextdoor, CAI events, reference assets). *(2-person fallback: Founder = Closer+Outbound; Builder = Content+product; protect demos + the weekly video batch.)*

9. 90-Day Calendar (2-week sprints)

Sprint	Wks	Focus	Target
S0	0–1	Get-ready-to-sell (§4): lead list, pitch one-pager, CSV template, pricing live, attorney intros requested	Outreach starts
S1	1–2	Outbound at volume to ONE county + attorney intros; first demos; ship self-serve wizard + toggle in parallel	First 5 demos booked

Sprint	Wks	Focus	Target
S2	3–4	First white-glove closes + onboards; capture references; first board-to-board referral asks	3–5 paying / activated
S3	5–6	Work the cluster; attend a CAI/board event; publish first ROI + fear pillars; lighthouse case studies	Referral ratio tracked
S4	7–8	Harvest neighbor intros; trial→paid conversions; founding-member locks; start 2nd county	Referral ratio ≥1.0
S5	9–13	Scale the winning motion; expansion into larger paid buildings; content compounding; kill weakest activity	**10–25 paying · ≥3 case studies**

---

10. Operating Guardrails (brief)

- Content stays general ("the law requires associations to…"), one-line disclaimer, route specifics to their attorney.
- Don't get banned: value-first in FB groups (mod permission, ≤1 post/group/week); on Reddit, a named human, not "Residente."
- Cold outreach hygiene: email the registered agent/president w/ postal address + unsubscribe; cold-call association/RA **landlines** only, business hours; no cold texts to personal cells.
- Don't name-and-shame a specific association; ride viral clips with the statute, not the drama.
- No fake social proof pre-references; disclose founder status on camera/press.

---

11. "Do This Monday" — First 5 Actions

1. **Build the 150–200-row lead sheet** (DBPR + SunBiz self-managed filter) and pick ONE county (recommend Miami-Dade/Broward). Researcher. $0.
2. **Write the "self-managed, made easy" one-pager** (all the work, 95% less time + the 2026 checklist, EN/ES/PT) and the 5-touch outbound sequence. Founder A + bilingual founder. $0.
3. **Ask the two CAM attorneys** for 3 client intros each (after a quick product walkthrough). Founder A. ~$0.
4. **Set pricing + card-up-front trial live** and stand up the Calendly + demo script. Founder A / Builder. $0.
5. **Start outbound** — first 25 contacts, first calls. Don't wait for the toggle or content. Whole team. $0.

---

12. THE EXECUTION MANUAL (the dead-simple part — do the quota, log it, review Friday)

Mirrored standalone in `gtm/execution-manual.md`. North-star: **net-new paying communities/month.** Builders also sell (~60% of week on product). Don't improvise — do the quota.

12.1 Daily & weekly quotas

4-PERSON SET — F=Closer, C=Content, O=Outbound, B=Builder:

Activity	F	C	O	B
Cold emails /day	5	0	15	0
Cold calls /day (RA/president landline)	3	0	7	0
LinkedIn touches /day	5	3	7	0
Community-group comments /day	2	5	5	0
Follow-ups /day	5	0	8	0
Demos run /week	**4**	0	(O books)	0
White-glove onboards /week	**2**	0	0	1 (assist)
Short videos /week (team)	—	**2–3**	—	—
Pillar article /week (team)	—	**1**	—	—
Social posts /day (team)	1	2	1	0

Team weekly totals: ~100 cold emails · ~50 calls · ~60 LinkedIn touches · **4 demos** · **2 onboards** · 1 pillar + 2–3 shorts (English-first; translate what converts).

2-PERSON FALLBACK — Founder=Closer+Outbound, Builder=Content+product:

Activity	Founder	Builder
Cold emails /day	10	0
Cold calls /day	5	0
LinkedIn touches /day	5	2
Group comments /day	3	3
Follow-ups /day	6	0
Demos /week	**3**	—
Onboards /week	**1**	(assist)
Pillar /week	—	1 (every 2 wks OK)
Short videos /week	—	2

Hard rule: the last things to drop are (1) booked demos, (2) onboards, (3) attorney/referral asks. Cold-email volume flexes first; the content factory flexes before demos ever do.

12.2 Target-profile cards

A — "Diana the Treasurer" (self-managed condo · self-management + FEAR). 25–150 units, volunteer, owns the budget. **Find:** DBPR Managing-Entity records, SunBiz officers, condo-board FB groups, CAI chapters. **Trigger:** 2026 website mandate / SIRS / reserves. **Hook:** "*Self-managing your 2026 compliance doesn't have to be a second job — Residente does ~95% of the work, and we'll set up your records website this week, free.*" **CTA:** "Book a 20-min walkthrough."

B — "Marcos the Reformer" (resident · TRANSPARENCY, money-first). Owner, not on board, wonders where his dues go; suspects mismanagement/rigged votes. **Find:** Reddit (r/HOA, city subs), Nextdoor, neighborhood

FB. **Trigger:** dues hike, special assessment, opaque election. **Hook:** "*See exactly where every dollar of your dues goes — line by line — and vote in an election nobody can rig. Free for residents.*" **CTA:** free resident account (the money view) → optional **one-tap "introduce your board"** (name permission only) → founder closes. *No petition, no advocacy* — and when ≥2–3 owners in his building sign up, that account flips "hot" for outbound (§5.6).

C — "Doña Ana / Sr. Pereira" (ES/PT self-managed board · SELF-MANAGEMENT). ES/PT-first board member, Miami-Dade/Broward, running the community themselves. **Find:** ES/PT FB groups, board WhatsApp chats, Nextdoor, local radio. **Trigger:** 2026 deadline + the workload of self-managing. **Hook (ES):** "*Autogestiónese sin el dolor de cabeza — Residente hace el 95% del trabajo, en su idioma. Residentes siempre gratis.*" **CTA:** "Demo gratis en español/português + instalación sin costo."

12.3 Content ideas bank (25 ideas, 8–12 weeks)

Tags: **[F]**ear · **[T]**ransparency · **[S]**elf-mgmt. One core idea/week → 1 article + 2–3 shorts + posts.

#	Idea	Lever
1	"Self-managing in ~2 hours a month: the new math"	S
2	What running a self-managed community takes in 2026 — and what software handles	S
3	"All the admin work, 95% less time" — a day in a self-managed board's month	S
4	Brand-new HOA? How to run it yourself the easy way	S
5	The real cost of self-managing in 2026 (and how software shrinks it)	S
6	FL HOA website requirement 2026 — the checklist (we set it up free)	F
7	7 records FL law says MUST be on your website	F
8	SIRS / milestone deadlines: which buildings, by when	F
9	Reserve-waiver ban in 60 seconds	F
10	Estoppel fees: what owners overpay for	F
11	"Show me where my dues go" — live dashboard	T
12	A board vote even the vendor can't read	T
13	File a statutory records request in one click	T
14	3 signs your HOA election wasn't actually secret	T
15	Board-decision feed: every vote, every reason	T
16	Self-managed onboarding in one afternoon (timelapse)	S
17	CSV roster import → portal live	S
18	Dues by card today, ACH soon — no float, no markup	S
19	Amenity booking without the spreadsheet	S
20	ARC requests that don't get lost in a group text	S
21	ES: "Su asociación y la ley de 2026"	F
22	PT: "Transparência total para o seu condomínio"	T

#	Idea	Lever
23	Weighing whether to hire a manager? Try self-managing the easy way first	S
24	"What does it actually cost?" — pricing transparency	S
25	"Built by residents, for residents" — founder story	T

12.4 Daily checklist

Demand-gen people (90-min AM block): ☐ cold-email quota (5-touch DBPR/SunBiz) ☐ cold-call quota ☐ LinkedIn touches ☐ group comments (help first, link when asked) ☐ clear follow-ups ☐ **log every number before lunch.**
Content lead: ☐ today's 1–2 posts ☐ 1 raw clip toward the weekly batch ☐ reply to comments within 4 hrs.
Closer: ☐ confirm tomorrow's demos ☐ send today's demo recaps + next step ☐ advance every open deal one step.

12.5 Weekly checklist

- **Mon — Plan:** pick the ONE core content idea; Closer books the week's demos; Outbound loads next 50 DBPR/SunBiz contacts, **prioritizing "hot" accounts** (≥2–3 resident signups); seed 5–10 residents into each active target building (QR/flyer/group link) to warm it.
- **Tue — Produce:** batch-record the week's shorts + draft the pillar.
- **Wed — Ship & sell:** publish; schedule posts; run demos.
- **Thu — Close & onboard:** demos, white-glove onboards (Tier A/C), push founding-member offers.
- **Fri — Review & refer:** wall-numbers review; ask every happy onboard for 1 referral + a 60-sec case study; replenish lists; request attorney intros; send 1 warm-intro ask to the most-engaged resident in each warm account; bank 1–2 resident money-view testimonials (don't publish yet).

12.6 Wall numbers (review every Friday)

1. **Net-new paying communities this month** (north-star) — ramp 1→2→4.
2. **Demos run this week** — ≥4 (4p) / ≥3 (2p). *The leading indicator.*
3. **% activated in 14 days** — ≥70%.
4. **Referral ratio** (referred ÷ closed) — ≥1.0.
5. **Trial→paid %** — ≥15% (card-up-front should beat this).
6. **Warm/hot accounts** (≥2–3 resident signups) feeding outbound — growing.

If a number is red two weeks running, change the activity feeding it, not the target.

12.7 Tools & cost (<$500/mo)

Next.js blog $0 · Canva free $0 · CapCut free $0 · Tally free $0 · free CRM (HubSpot/Brevo) $0 · MailerLite free (→ ~$10/mo near the 500-sub cap) or EmailOctopus free · DBPR + SunBiz lists $0 · Calendly free · Loom free · Google Voice/OpenPhone ~$0–15 · direct-mail postcards ~$30/mo · clustered travel ~$120/mo. **Total well under $500/mo.**

Bottom line

Sell with your mouth first. Founder-led outbound to public lists + free white-glove onboarding is the engine; the two attorneys and board-to-board referrals multiply it; community presence and content compound behind. Every pitch lands on one promise — *all the work, 95% less time* — opened by the 2026 deadline and spread by residents who can finally see the books. Do the §12 quotas, protect the demos, and let the content factory come after you've proven, in person, that boards will pay.
